Provider Manager Application Frontend Guide

This document describes the user interface of the Provider Manager application. It explains how to open sections and complete tasks.

1. Overview

The frontend is a React web application. Vite builds this application. The frontend connects to a .NET API backend to send and receive data.

The application contains two main parts:

- **Manage Providers:** A page with a form and a data table. Use this page to manage providers and provider licenses.
- **Dashboard:** A page with statistics. Use this page to view provider status summary data.

2. Manage Providers

The Manage Providers section lets you create, view, update, and remove provider records.

Add a Provider

Use the form at the top of the page to add a new provider:

- Enter the provider details into the input fields.
- Click **+ Add License** to attach one or more licenses to the provider.
- Enter the license details for each attached license.
- Click **Save** to create the provider record.

View Provider Details

The data table displays all provider records.

- Click on any row in the table to expand the row.
- The expanded row shows all licenses for that specific provider.
- Click the row again to collapse it.

Edit or Delete a Provider

Each row in the data table contains action buttons:

- Click **Edit** to open the provider details, modify the fields, and save changes.
- Click **Delete** to remove the provider record from the active list.

3. View Reports

Use the View Report drop-down menu above the table to filter the data table contents.

Report Option	Description
Standard Listing (Exclude Deleted)	Shows all active provider records. Hides deleted records.
Active Providers w/ Active Licenses	Shows only active providers that have valid licenses.
Active Providers w/ Expired Licenses	Shows only active providers that have expired licenses.
Audit Trail (Soft Deleted Records)	Shows all records that users deleted from the main view.

Select an option from the drop-down menu. The table updates immediately to show the filtered data.

4. Dashboard

The Provider Dashboard section displays high-level statistics about provider licenses.

The dashboard contains two main visual elements:

- **Pie Chart:** Shows the distribution of providers across different license statuses.
- **Summary Table:** Displays the total count and the percentage of providers for each status category (for example, *Active Prov / Active Lic*).

Use this page to monitor system compliance and view overall license status quickly.
